DIAGNOSTIC SOLUTIONS INFORMATION

Functionality of Delphi's Diagnostic Solutions is determined by the Vehicle Communication Interface (VCI), Display Hardware and related software package

STEP 1 - Decide the Level of Diagnostics Suitable for your Business Diagnostics or Diagnostics inc. Oscilloscope and Multimeter

The **Mini VCI** is for Diagnostics

It can be used with all Delphi Hardware Platform Options or with your own laptop utilising Delphi's Bluetooth Dongle.

The **Combined VCI and Diagnostic Probe Kit** is for Diagnostics and Component Testing using the built in Oscilloscope or Multimeter. It can be used with all Delphi Hardware Platform Options except the DS100E PDA (due to limited memory size that is required to run the additional functionality). Can also be utilised with your own laptop utilising Delphi's Bluetooth Dongle.

The Combined VCI allows physical measurements via built in bluetooth Oscilloscope & Multimeter & Various other additional sensors and probes for measurement of Current, Vacuum, Flow, Pressure and Temperature (Optional Extras).

The Combined VCI also includes Flight Recorder via EOBD.
(Delphi's Bluetooth Dongle has been validated for accurate communication with the VCI's)

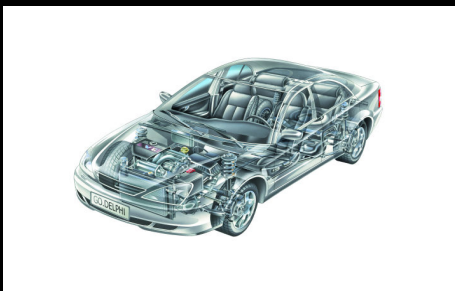

MINI VCI

CHOOSE MINI or COMBINED VCI

COMBINED VCI + DATA DIAGNOSTIC KIT

STEP 2 - Choose the Software package required CAR / TRUCK or BOTH

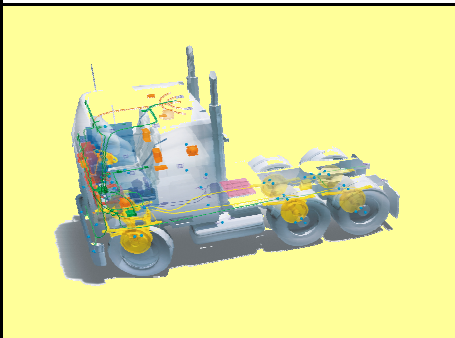

CAR and LCV Software

- OBD & EOBD serial diagnosis, Service Light Reset
- Read & Erase fault codes for all systems (EMS, ABS, SRS, Climate control, Instrument panel, Immobiliser etc.)
- Look at Live Data, ECU Coding
- Component Activation, Parameter Adjustments

Equipment supports diagnostics on over 27'000 vehicle models from over 45 Vehicle Manufacturers,

Covering more than 85% of the European Vehicle Parc
See main Application list for full details

Trucks, trailers, buses and LCV Software

- OBD & EOBD serial diagnosis, Service Light Reset
- Read & Erase fault codes for all systems (EMS, ABS, SRS, Climate control, Instrument panel, Immobiliser etc.)
- Look at Live Data, ECU Coding
- Component Activation, Parameter Adjustments

Extensive vehicle manufacturer coverage.

Trucks: DAF, Iveco, MAN, Mercedes, Renault Trucks, Scania, Volvo Trucks

Buses: Volvo Chassis, Evobus Chassis

Trailers: Haldex, Knorr, Wabco

LCV: See main application list for full details

**** Additional Truck Cable Adapter SV10609 is needed with any Truck Hardware package****

Car and Truck Diagnostics can be run side by side on any Delphi Diagnostic Solution
CAR and TRUCK Software is available for both PDA and PC Formats
All Software is an annual subscription - with a minimum of 3 Updates per Year

SOFTWARE & VCI ONLY PACKAGES

ADDITIONAL SOFTWARE

Part Number	RRP	Functionality	Platform / VCI Compatibility
SV11046	£590	DELPHI LIGHT VEHICLES TECHNICAL DATA 1 YEAR LICENCE **Also Includes FREE £215.00 of DIAGNOSTIC ASSISTANT & DATIS Software**	Can be used on any PC Based Platform
SV11048	£1085	DELPHI HEAVY DUTY TECHNICAL DATA 1 YEAR LICENCE **Also Includes FREE £215.00 of DIAGNOSTIC ASSISTANT & DATIS Software**	
SV10017	£95	SBQC - SERVICE BAY QUALITY CHECK Vehicle walk round check sheet and EOBD System Check	
SV10018	£130	DIAGNOSTIC ASSISTANT - Annual Licence This is a generic database designed to help the auto technician develop their knowledge of components and systems. The database encompasses Accessories, Batteries, Brakes, Engine Management, Climate Control, Transmission, Instrument Panel, Steering and Suspension, Airbags, Body and Engine Mechanical parts.	
SV10020	£75	AUTO IQ - (One off Fee) Designed as an interactive learning aid, AutoIQ features: •Detailed content •Full-motion video •Animated technical diagrams You can use AutoIQ to demonstrate to your customers the purpose, functionality and service requirements of a given vehicle system. This information enhances the communication process between you and your customers. Improved communication allows you to better explain service procedures, as well as justify individual labour expenses.	
SV10078	£85	DATIS - (One off Fee) This is a more specific database and information library with more information directed towards Diagnostics and Vehicle Electronics. The database consists of information relating to Diagnostics, Sensors and Actuators, EOBD fault codes, Primary and Secondary ignition circuits, Exhaust emissions and gas analysis, Diesel systems including common rail, ECU's and component waveform library showing typical oscilloscope signatures of perfect components, to be used as a reference library when comparing against suspected faulty components. Related sections are linked for quick and easy access, with clear and concise illustrations provided for the benefit of both The Technician and the customer.
